EXPERIENCE

OmniRoute — Open-Source AI Gateway (50k stars)

Jul 2026 – Present

Open Source Contributor · Remote

- Diagnosed and fixed an HTTP 400 regression affecting strict LLM providers; proposed a declarative Zod schema flag adopted by the maintainer into the shipped fix, with 55/55 passing tests (PR #6225).
- Shipped 5+ merged PRs across a 230+ provider codebase — a Claude provider registry integration, an accessible provider-rankings filter (168 additions, 9/9 tests), and docs normalization across 42 locales.

nTheta Works Pvt. Ltd.

Oct 2025 – Dec 2025

Full Stack Developer Intern · Remote

- Engineered a two-stage semantic retrieval pipeline (Ollama embeddings → Redis HNSW → FlashRank reranking) for an enterprise LLM API-testing platform, improving template-matching precision and reducing manual QA review workload.
- Deployed async FastAPI microservices and Next.js/TypeScript dashboards, containerized with Docker Compose and CI/CD on Linux.

OBG Outsourcing Pvt. Ltd.

May 2025 – Jul 2025

Full Stack Developer Intern · Jaipur

- Led FinSageAI360, a multi-tenant financial-intelligence SaaS with a JWT-authenticated REST API and granular RBAC, automating close-reporting via AI anomaly detection and real-time KPI dashboards.

Om Logistics Ltd.

Jun 2024 – Aug 2024

Software Developer Intern · Delhi

- Optimized document search with LangChain + FAISS embeddings, improving retrieval across 10,000+ documents.

PROJECTS

MiningNiti · AI Document Intelligence & Compliance Platform | *SIH 2023 National Winner* | [GitHub](#) · [Live](#) 2025 – Present

- Built and deployed a production RAG platform (36 REST endpoints) with hybrid retrieval (pgvector HNSW + PostgreSQL full-text via Reciprocal Rank Fusion, cross-encoder reranking), turning mining safety PDFs into a citation-backed knowledge base with SSE streaming and clause-level compliance auditing.
- Developed a retrieval evaluation harness (Hit Rate@k, MRR, nDCG@k) as a CI gate that caught a latent bug where the lexical search arm had silently returned zero rows since launch; designed a 5-agent pipeline across 3 LLM providers with automatic failover, hardened with JWT verification, SSRF guarding, and prompt-injection filtering — backed by 242 passing tests.

NLPForge · AI NLP Dataset Generator & Semantic Search Platform | [GitHub](#)

2025

- Architected a full-stack RAG platform converting natural-language queries into executable API test cases via a two-stage Redis HNSW → FlashRank reranking pipeline, across 8 LLM providers with 70 unit tests.
